HANGZHOU DAWNJOINT B&T CO.,LTD

This is of 100% waterproof fabric IPX6, medium volume, strap mount saddle bag. It uses radio frequency welded seams throughout for maximum protection from the elements.

It uses a saddle rail and seatpost strap fixing system that will fit any bike and can be added and removed in seconds.

Double reinforced stitching and webbing taped mounting points help it carry up to 1.2L / 1.5KG of your stuff and helps protect your important electronic items from being knocked about, so you can pack that smartphone- just in case.

Forget about the hassle of stuffing everything into the back pockets of your jersey and let this bag take the strain instead. With a large roll-top closure, you can access your gear in seconds. With a full 1.2 L capacity, there's plenty of space for all your daily items- even that emergency waterproof jacket.

Designed for riders who ride in all conditions and at all times of day the Retro-reflective detailing helps you to be seen by other road users when it starts to get dark.
